

"The success of this project has been exactly what we had hoped for at Dartmouth College. As we move forward with future projects, it is good to know that we can count on Engelberth as a source of professional service and quality construction."

Matthew Purcell, PE
Assistant Director
Planning, Design & Construction
 Dartmouth College

"The professionalism, commitment and positive attitude of the Engelberth team from preconstruction through the grand opening and post opening periods made this project run smoothly. Engelberth Construction should be proud of their efforts to deliver this wonderful addition to the Keene State Campus."

Jay Kahn
VP for Finance and Planning
 Keene State College

SOLUTIONS

INDUSTRY LEADER

Within the academic market, Engelberth Construction and its team members have clearly distinguished themselves as industry leaders through levels of repeat assignments as well as outside recognition. Approximately sixty percent of our annual work is completed for higher educational institutions. We understand the competition for students between colleges and universities, and have the knowledge and experience to differentiate your campus from the competition. From modernization projects to large classroom buildings and student residences, we can help provide the edge your institution is looking for.

SUSTAINABLE CONSTRUCTION

The importance of preserving our resources for future generations continues to grow. Colleges and Universities all around the Country are turning to green construction alternatives as a means of educating students about the importance of protecting our resources, and also to reduce costs by utilizing materials and systems that use less energy, water and create less waste. We have embraced green building as part of our corporate culture and have worked hard to build a solid foundation of expertise in sustainable construction techniques. Engelberth has completed several LEED® certified buildings and has a number of LEED Accredited Professionals on staff. Regardless of whether a project is going for LEED certification or just using the LEED Green Building Rating System™ as a guide, Engelberth Construction brings the skills and experience necessary to achieve your goals for sustainable, high performing buildings.

RENOVATIONS COMPLETE, WITHOUT DISRUPTING CAMPUS ACTIVITIES

The continuous cycle of transformation on college campuses require that renovations occur, while your facilities remain fully functional and safe. This is the formidable task to which we bring our broad skills and knowledge. Construction must be planned, orchestrated and executed without compromising the living and learning environments of students and faculty. Years of experience, combined with our trained workforce, integrated systems, strict safety policy and open communications enables us to respond to all types of situations, guaranteeing you of a successful project.

AN OPEN BOOK APPROACH

Building relationships for life is not easy, the key to Engelberth's success is the earned trust of their clients. Utilizing an open book approach, Engelberth shares details about every cost associated with your construction project. (ie., materials, labor, profit, etc.) We strive to be as transparent as possible, leaving no questions of hidden fees or costs, misleading estimates or unattainable schedules. This open book approach empowers our clients to feel confident, and allows our team to focus on their number one job of representing your interests.
